Subject: RE: Grumman

I said we took the splits Friday no data yet

Grumman provided us access to the data yesterday will start review this week

Thanks for the clarifications Eric

Regarding item 3. Bob had mentioned that you have results for the split sampling. Have you made those public yet....and if so, can we say something with regard to the results?

On item 1, has Grumman provided information yet or is there and expected timeframe for them to submit the info?

Doug

Doug,

Below in the text of the letter are the edits in red and blue and stricken out.

As Bob indicated he will try to get a response from Exec this week on any remaining issues.

Subject: FW: Grumman

Below are Tim and my edits are below.

Two things:

- 1) In Doug's 4th paragraph 4th sentence he quotes Schumer's letter saying "...Northrup Grumman declined to provide to provide any details on its historical use, storage, or disposal of radiological materials at the Site." While that's Schumer take on the matter I don't know if we ever asked for the details in 2016.
- 2) The last sentence of the 5th paragraph states 10 landfills, because that's what was published in the press, it was actually 9 (see attached).

Let me know.

Eric

Hi Eric

I just wanted to check in to see whether anything has changed in the last two weeks wrt DEC issuing a fact sheet, plan or response to correspondence on this matter. If you do have something that we can reference that would help us craft our response to Senator Schumer.

Thanks

Doug

Eric/Tim

As mentioned during our 7/13/17 call, the radium data had been released to members of the NG/Navy Gw coordination group last year. Per your request I am forwarding the email that distributed the data.

I am also copying Bob per your request.

Subject: Phase 2 Radium Sampling - results

Attached are the results from the second phase of the radium sampling. We are combining it with the first phase results and trying to figure out how to present it and what it means. We resampled GM15S (the well near the plant boundary with the relatively elevated level – 8.59 pCi/l) and results are less than 5 pCi/l. Only two wells in this round exceeded 5 pCi/l and both were less than 6 pCi/l. Jim H
